

# DISPENSE-RITE® MCDC SERIES MOBILE CART SETUP & BAFFLE SELECTION INSTRUCTIONS

The MCDC mobile cup dispensing cart ships fully assembled. You will need to select and install the correct size silicone baffle for your cup size at the time of setup. Please refer to the baffle selection instructions below.

**Important Note:** if you are dispensing heavy plastic tumblers you may need to install both of the supplied springs together in each cup dispenser. If needed remove plunger to add a second spring to each cup dispenser.

- 1** Rotate the cover ring counterclockwise and remove from the dispenser. Remove the cardboard insert and discard.

Inside the dispenser you will find a complete set of interchangeable baffles that cover a full range of cup rim diameters ranging from 3" - 4-1/2" (8 oz. to 44 oz. cups).

You will also find an additional spring that may need to be added when dispensing heavy plastic tumblers.

- 2** Determine which is the correct baffle for your particular cup size. Refer to the diagram shown on the right for correct baffle sizing. The appropriate baffle should be selected based on a measurement of the cup's outside rim diameter.

- 3** Install the appropriate baffle onto the ring by lining up the posts in the ring with the holes in the baffle. Be sure the baffle is completely flush with the underside of the ring and that it is inserted underneath the three retention tabs prior to reinstalling.

- 4** Reinstall the cover ring onto the dispenser and rotate clockwise to secure.

- 5** Insert a full sleeve of cups into the dispenser to test if the baffle is the proper size for your cups. If you are not satisfied with the dispensing action a baffle change may be required.

## SLR-2 Series Rubber Baffles (select one)

**Small Baffle (1 notch)**  
Cup Rim Diameters: 3" - 3 1/4"  
Approx. Cup Sizes: 8 - 14 oz.
